

2010 Blitz Build big success!

*Raising the second floor of a side-by side in perfect position.*

More than 2200 volunteers showed their community spirit by helping build 10 Habitat homes over 11 days for our families in need. Other than a day or two of challenging weather, the sun shined on all of us as the volunteers worked side by side along with the future homeowners to create a great atmosphere of team work and comradery. This year's Blitz Build included eight side by side homes having their second floor and roofs constructed on the ground and being raised by a crane into perfect position. It created quite a spectacle and received much media attention to further raise the awareness levels of the Habitat mandate. Habitat for Humanity Winnipeg graciously thanks all the hardworking, passionate volunteers and our very generous sponsors for their continuing support.

*The essence of team work as volunteers raise a wall together.*
